

## Welcome all IJKDC 2017 participants ...

Bruce Lee created JKD as one of the most progressive original modern-day martial arts. The focus of JKD is partially on the personal liberation from rigid structures often associated with a degree of traditional martial arts styles or formulated systems.

Often referred to as the "style of no styles", Bruce Lee developed his JKD by "using no way as way" and "having no limitation as limitation" as his personal philosophy. With his simple, direct and non-classical approach, Bruce Lee achieved great success. His global influence on the martial arts is still evident to this day.
